

uses Bella Blankets[®] protective coverlets on every woman's mammogram as an extra level of care.

Here are the reasons why:

- ✓ **More Breast Tissue**
The unique material helps to hold your breast in place so that we can get more breast tissue for the doctor to see¹
- ✓ **More Sanitary**
The coverlet is used only on you and acts as a sanitary barrier between you and the equipment*
- ✓ **More Comfortable**
The material removes the chill from the equipment, making your mammogram feel warmer

Call us today to schedule your mammogram.

1000 Medical Center Drive
