

COVID-19 Testing Information

Kirby Medical Center does not provide COVID testing upon request. We do not offer drive through testing for the general public and we are not an IDPH designated testing site. The closest designated site is Market Place Mall in Champaign. They provide drive through testing 8-4 daily while supplies last.

Kirby Medical Center does offer COVID-19 testing collection with a doctor's order, just as with any other lab test done at Kirby. These tests are then sent for processing. Again, these are done with a provider's order based on symptoms, exposure, congregate living situations, and for surgical procedures.

If you would like to have a test collected at Kirby, please contact your provider to discuss your needs. For questions, please call 217-762-2115
